

# Roohan Ghulam Muhammad

React Native Developer

(+92) 303-4064651 gmroohan@gmail.com roohan.me LinkedIn GitHub

## Professional Summary

React Native Developer shipping AI-enhanced mobile apps. Specializes in React Native, Node.js, and Firebase with a focus on clean architecture, async remote workflows, and AI-assisted development. Delivered 5+ live apps on Appstore and Playstore.

## Technical Skills

**Core:** JS/TS, React Native, React.js, Node.js, Express

**Data & Auth:** REST, JWT/OAuth, Firebase, PostgreSQL, MySQL

**State & UI:** Zustand, Context API, Figma-to-Code, Hooks

**AI & DevOps:** Copilot, Prompt Eng., Docker, GitHub Actions, CI/CD

**Quality:** ESLint/Prettier, Memoization, Bundle Optimization

**Remote:** Async Work, Git, Slack, Notion, Self-Managed Delivery

## Professional Experience

### React Native Developer | SwiftSoft

Nov 2025 – Present | Hybrid

- Shipped 5 production apps independently; zero critical post-launch bugs.
- Optimized performance via memoization & lazy loading.
- Integrated JWT-secured REST APIs with offline caching.
- Managed end-to-end deployment: CLI/Expo builds, app signing, store coordination.
- Accelerated feature delivery using GitHub Copilot for boilerplate.

### Trainee Mobile Developer | BUGGCY

Jun 2025 – Sep 2025 | Remote

- Built full-stack React Native apps with Node.js/Express backends & secure JWT/OAuth 2.0.
- Defined API contracts, tested via Postman.

## Key Projects

### Profit AI Trading: Signal Bot

50K+ Downloads • 4.3★

- Integrated real-time financial data & TradingView charts.
- Automated trade recommendations via Firebase Cloud Functions & technical indicators.

[Android](#) • [iOS](#)

### AI Car Modifications (CarMod)

1K+ Downloads • 4.9★

- Built AI visualizer for real-time car mod previews.
- Implemented on-device caching & background scheduling for smooth UI on mid-tier devices.

[Android](#) • [iOS](#)

### PTE Exam Practice (AcePTE)

5K+ Downloads • 4.5★

- Delivered offline-first prep app with AI Speaking/Writing grading & sync-on-reconnect.
- Reduced user drop-off by 28% via adaptive difficulty & contextual onboarding.
